Because writing assignments are meant to prepare you for class discussions, you must post a draft question on the Moodle Forum for this date if you want your submission to count. After posting a draft, you must revise and resubmit your final response for a grade by the following Sunday night. In the case of questions posted below, the final draft of your question is due by the end of the day on Sunday, November 17. Include your name, the full question number, and the text of the question on both your draft and final submissions.

23-1  According to liberals, why do we commonly find that social programs do not do what they are supposed to do?

23-2  "Community" may or may not exist in a locality and its presence or absence has a profound effect on social problems. How does community affect social problems? If one is trying to "organize" the community to address social problems, what specifically is one trying to do?

23-3  Pluralism argues that democracy works when all interest groups in society organize themselves and effectively compete for access and attention in the political process. Does this mean we should support citizens who organize effectively to achieve obnoxious purposes---like a racially segregated housing area or oppression of gays in a community?
